PROFILE INFO

To redefine how users interact with technology by designing thoughtful, inclusive, and emotionally engaging digital experiences — by bridging the gap between creativity, design thinking, and smart technology to make everyday interactions simpler, smarter, and more human.

DESIGN PROJECTS

2030 - PRESENT

Lago, Nigeria.

A Better Way to Book Flights

- I was able to think like a UI/UX Designer and I made UX-Researches which enabled me to dive into the user experience, for the project and with what I got, I worked hand in hand with my Mentor.
- I was able to develop and execute a comprehensive flight booking app design, with the required user flow.. IN FIGMA that align with the company's goals and objectives.

2027 - 2030

Lagos, Nigeria.

Smarter Note-Taking for Students

- I was able to hold user interviews with students, and different personnel, and got User Research Findings.
- With my User Research Findings I was able to Create a solution that is not just helpful to students but to the whole School system, Best part is that it fosters a collaborative and results-driven Learning environment.
- This project was part of my ongoing exploration into student productivity tools & smart campus systems.
